Biography

Kevin White has been a licensed professional engineer in the State of Florida for over ten years, and joined Waldrop Engineering in 2016 as the Director of Engineering of the Orlando office. He is responsible for daily operations and business development for the Orlando office, while continuing to serve clients in a Project Management role. As the head of the Orlando division, Kevin leads the engineering design team, prepared proposals for professional services and manages staff in the day to day business operations. His staff leads Civil Engineering design, planning and permitting services within multi-disciplined project teams. Kevin's primary objective is to insure the owner's vision is executed from inception to final close out. Corporate responsibilities include participating in marketing analysis to develop strategies for growth and implementing corporate goals at the department level. He also actively engages in Business Development to foster existing and future business with Private and Public clients.

Recent Project Experience

Greenway Park Apartments - Orange County, FL

Project Manager and Engineer of Record for 348 unit HUD multifamily Tavistock development with utility, roadway and drainage infrastructure. As the engineer of record, Kevin provided concept and final engineering plans to include onsite layout, grading, drainage and utility design. In addition to producing final plans, Kevin's team guided the local, state and federal planning, zoning, engineering and environmental permitting process. Acting as member of the design team, Kevin's site engineering construction documents were submitted as a part of the HUD package insuring the project demonstrated Completeness, Consistency and Compliance. The project is scheduled to begin construction the 1st quarter of 2017.

FedEx Distribution Facility - Miami Dade County, FL

Project Manager for due diligence of proposed 231,000 sf distribution facility on 50 acre site in Miami Dade County, FL. Services rendered included but were not limited to preparation of a Due Diligence report identifying site history, physical characteristics, on and off site permitting requirements, explanation of local, state and federal permitting procedures, preliminary site plan and preliminary engineering documents for design bid services. As the project manager, Kevin regularly attend meetings on behalf of the owner, served as principal coordination officer for sub disciplines and prepared engineering analysis and other documents for the owner, owner's representatives and county staff.

Reams Road Widening - Orange County, FL

Project Manager and Engineer of record for 0.34 mile road way widening and turn lane construction onto Disney North Service Area. Kevin's design team provided final roadway construction plans, drainage and stormwater conveyance design, coordination with adjacent developments, utility coordination of underground and above ground utilities. As the project manager, he provided client representation to permitting agencies and adjacent developments. Upon commencement of construction activities, the design team provided post design services. Services rendered include coordination with the owner, contractor and permitting agencies; review of shop drawings, periodic site visits and certification of completions for the site.
